From a **small world** on a large planet...

METROPOLI AGRICOLE

#2030. Sistemi agroalimentari per la sostenibilità: un dialogo tra locale e globale

To a **large world** on a small planet...

The broiler chicken as a signal of a human reconfigured biosphere

- *Over 65.8 billion meat chicken carcasses were consumed globally in 2016*
- *Standing population 22.7 billion and lifespan of five to seven weeks*
- *The standing biomass of domesticated poultry, mostly chickens, has been calculated about three times higher the total biomass of all wild bird species combined*
- *This monospecific vast bird biomass is unprecedented in Earth's recent history and perhaps also in Earth's geological history*
- *It is thought that the most common wild bird in human history, the passenger pigeon, had a population of 3-5 billion in 1800s*

70%
of birds are
chickens and
other poultry

30%
are wild

Of all the mammals on Earth, 96% are livestock and humans, only 4% are wild mammals

60%
are livestock

36%
are humans

4%
are wild
mammals

Protect the last of the wild

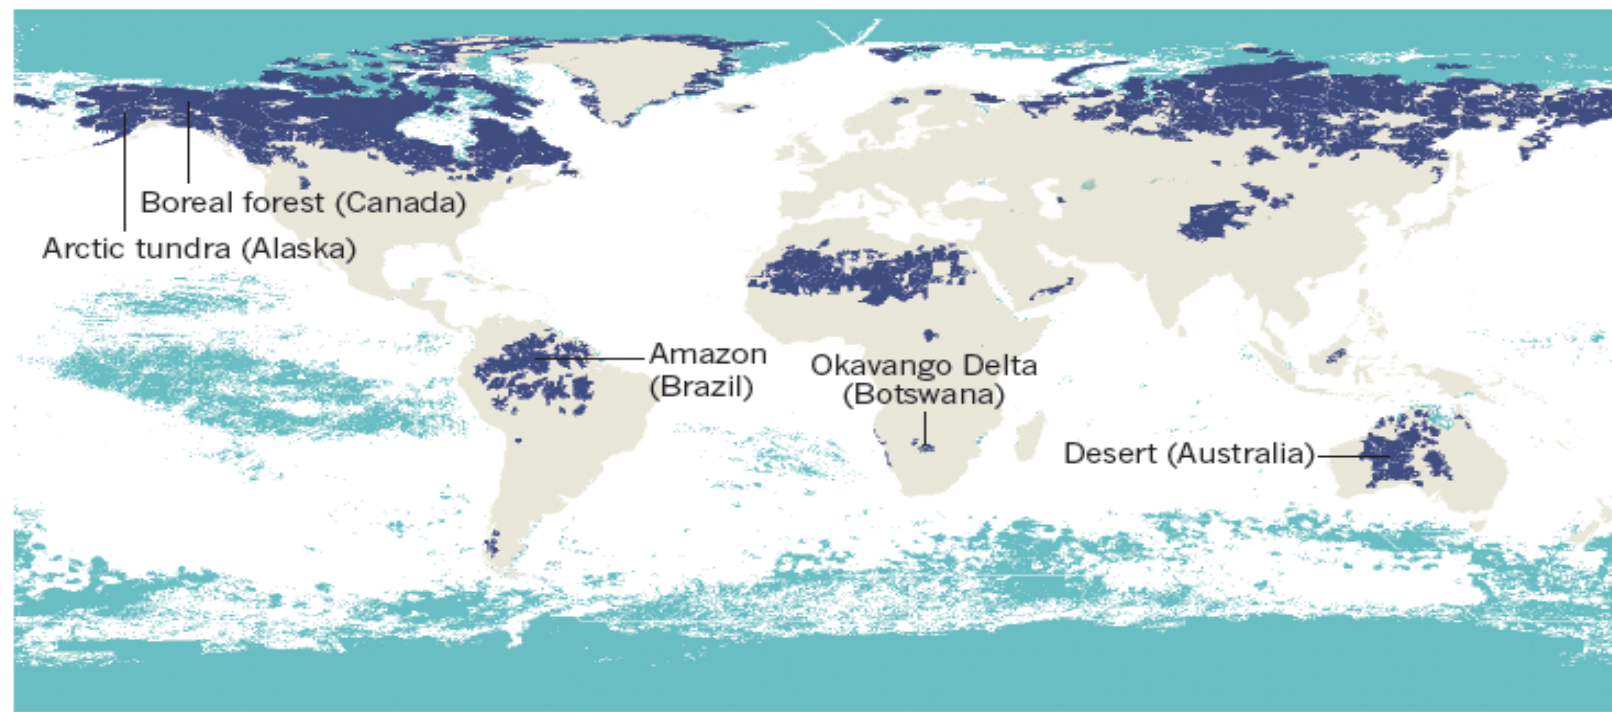

WHAT'S LEFT?

Earth's remaining wilderness areas are becoming increasingly important buffers against changing conditions in the Anthropocene. Yet they aren't an explicit target in international policy frameworks.

THE HUMAN FOOTPRINT

77% of land (excluding Antarctica) and 87% of the ocean has been modified by the direct effects of human activities.

REMAINING WILDERNESS: ■ Terrestrial ■ Marine

2050?

Dense Settlements

- Urban
- Mixed settlements

Villages

- Rice
- Irrigated
- Rainfed
- Pastoral

Croplands

- Residential Irrigated
- Residential Rainfed
- Populated
- Remote

Rangelands

- Residential
- Populated
- Remote

Seminatural

- Residential Woodlands
- Populated Woodlands
- Remote Woodlands
- Inhabited Treeless & Barren lands

Wildlands

- Wild Woodlands
- Wild Treeless & Barren lands

Summary Report of the EAT-Lancet Commission

Healthy Diets From Sustainable Food Systems

Food Planet Health

Earth system process	Control variable	Boundary (Uncertainty range)
Climate change	 GHG emissions	5 Gt CO ₂ -eq yr ⁻¹ (4.7 – 5.4 Gt CO ₂ -eq yr ⁻¹)
Land-system change	 Cropland use	13 M km ² (11–15 M km ²)
Freshwater use	 Water use	2,500 km ³ yr ⁻¹ (1000–4000 km ³ yr ⁻¹)
Nitrogen cycling	 N application	90 Tg N yr ⁻¹ (65–90 Tg N yr ⁻¹) * (90–130 Tg N yr ⁻¹)**
Phosphorus cycling	 P application	8 Tg P yr ⁻¹ (6–12 Tg P yr ⁻¹) * (8–16 Tg P yr ⁻¹)**
Biodiversity loss	 Extinction rate	10 E/MSY (1–80 E/MSY)

*Lower boundary range if improved production practices and redistribution are not adopted.

**Upper boundary range if improved production practices and redistribution are adopted and 50% of applied phosphorus is recycled.

MEASURING WHAT MATTERS IN AGRICULTURE AND FOOD SYSTEMS

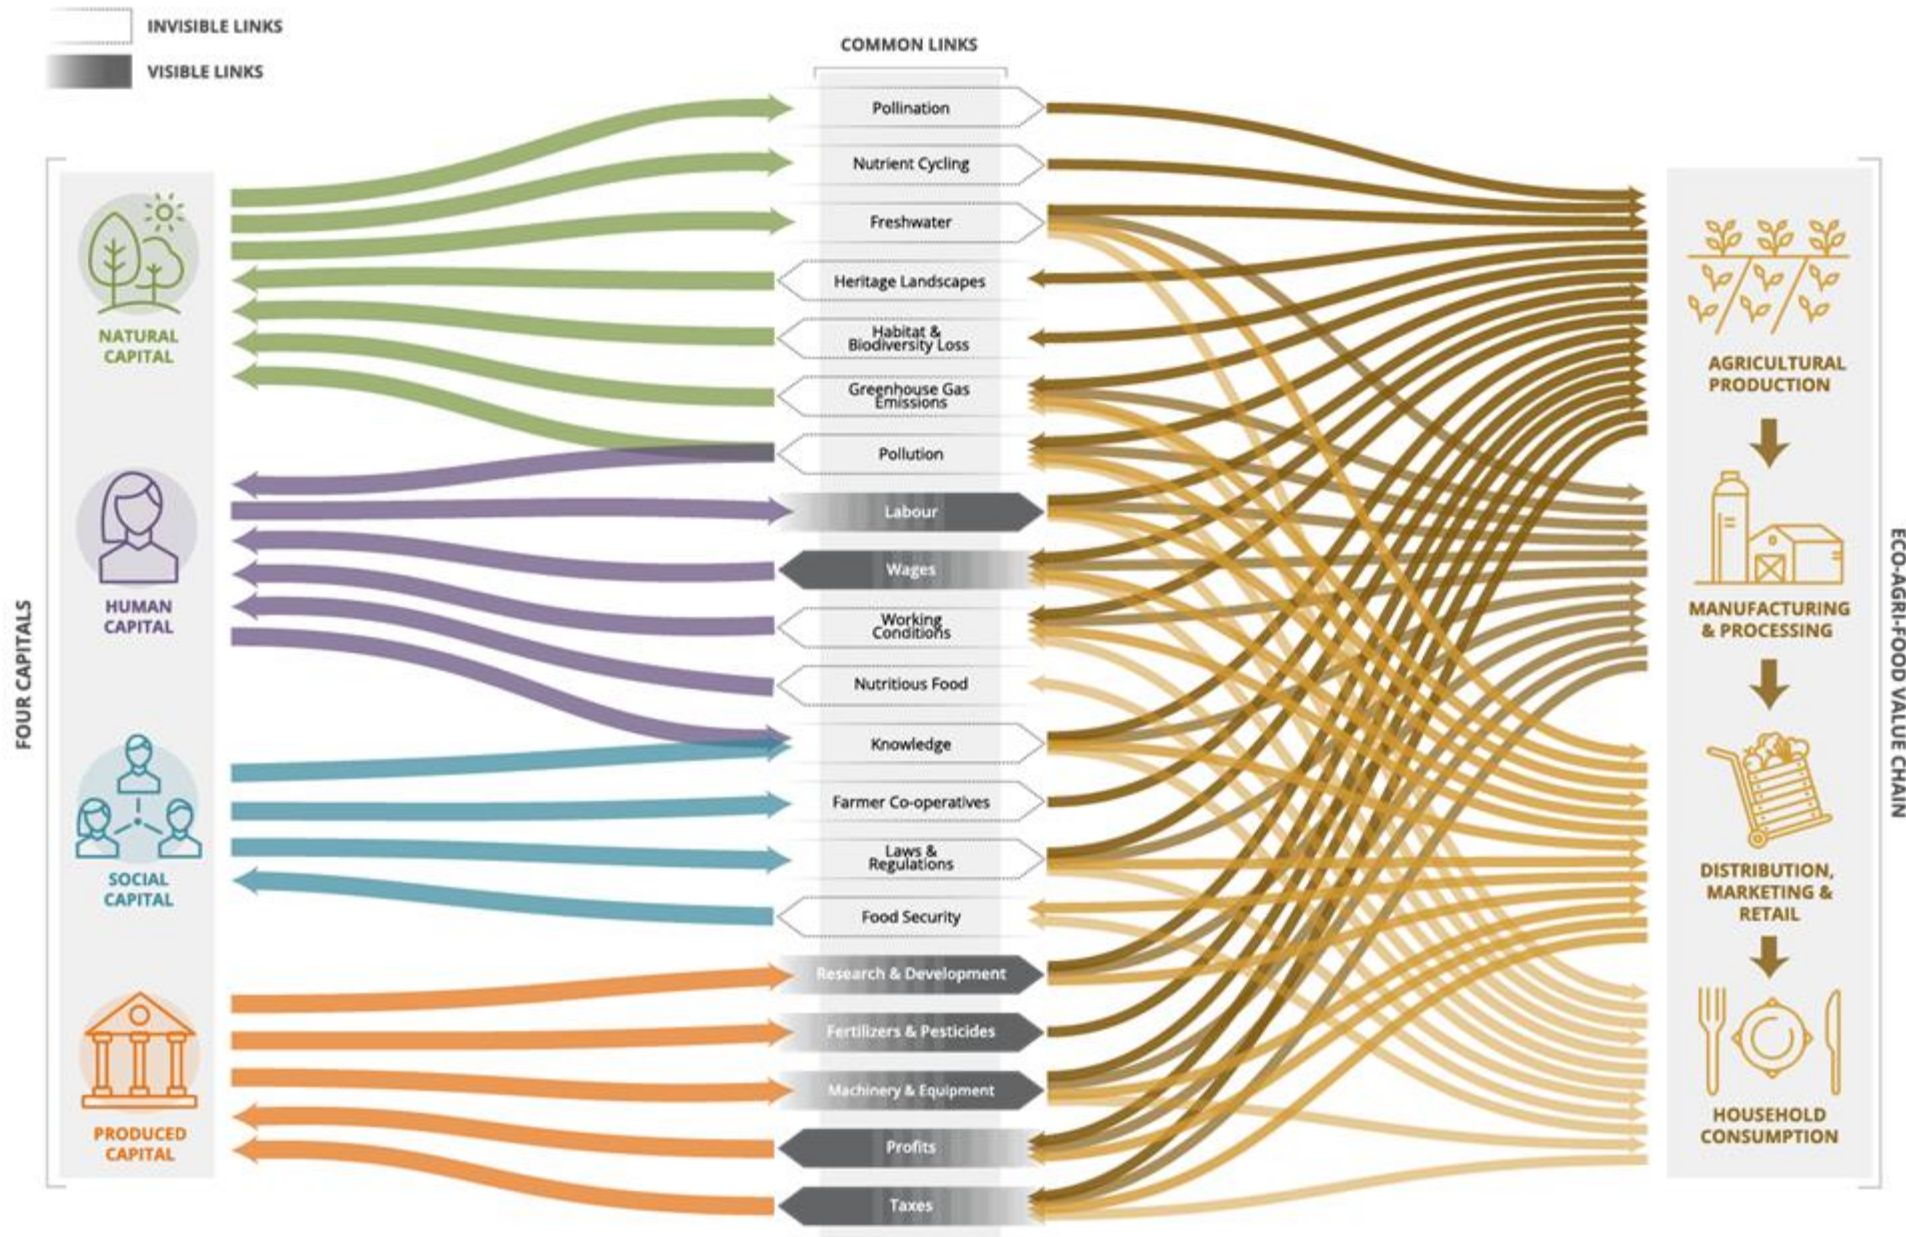

*A synthesis of the results and recommendations

Scientific and Economic Foundations Report*

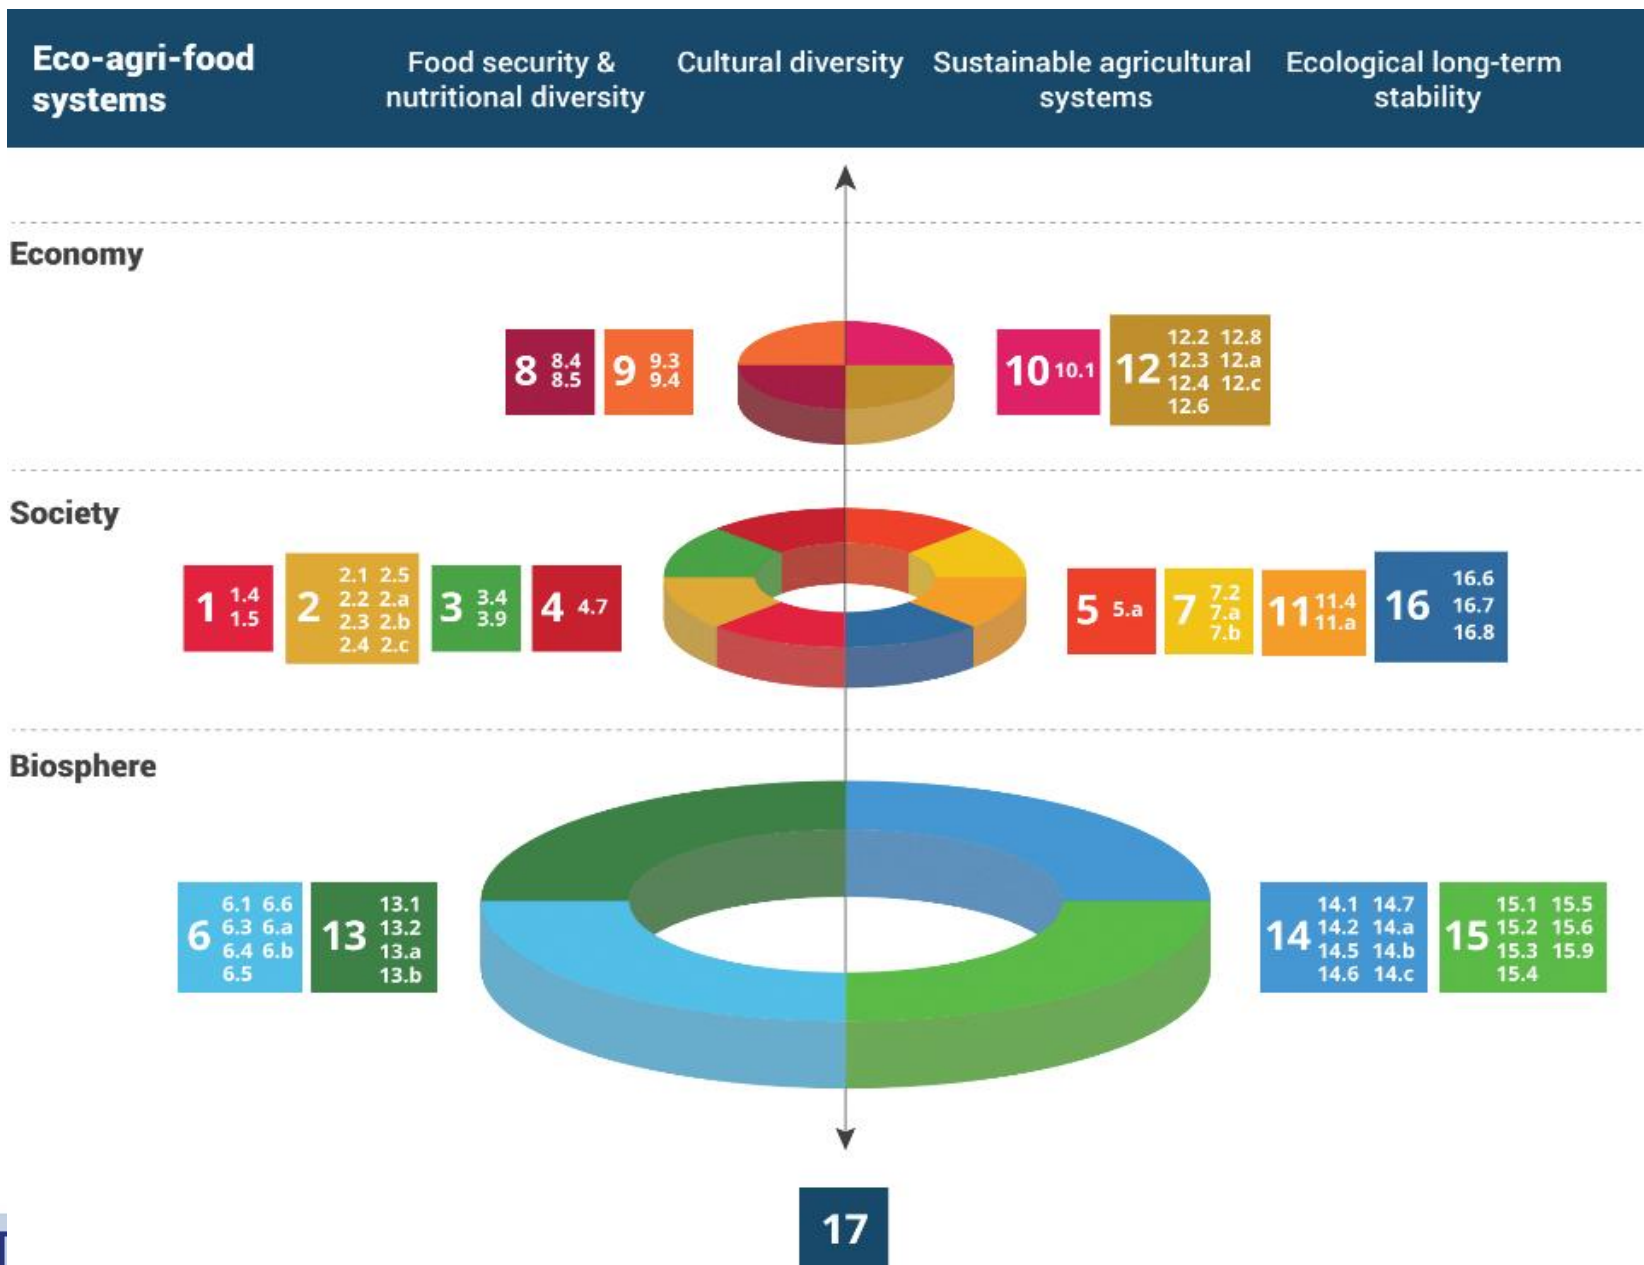

TEEB FOR AGRICULTURE & FOOD SCIENTIFIC AND ECONOMIC FOUNDATIONS REPORT

LINKS BETWEEN FOUR CAPITALS AND THE ECO-AGRI-FOOD VALUE CHAIN

SDG'S THREE-TIERED STRUCTURE AND LINKS TO ECO-AGRI-FOOD SYSTEMS

Sustainable Eco-Agri-Food Systems

- *Sustainable Eco-Agri-Food Systems need to operate within the Safe Operating Space (S.O.S.)*
- *Transformation to sustainable Eco-Agri-Food Systems for about 10 billion people by 2050 should use no additional land, safeguarding existing biodiversity, reduce consumptive water use and manage water responsibly, substantially reduce nitrogen and phosphorus pollution, produce zero carbon dioxide emissions, and cause no further increase in methane and nitrous oxide emissions*
- *Transformation to healthy diets by 2050 will require substantial dietary shifts, including a greater than 50% reduction in global consumption of unhealthy foods, such as red meat and sugar, and a greater than 100% increase in consumption of Healthy foods, such as nuts, fruit, vegetables, and legumes (the changes needed differ greatly by region)*

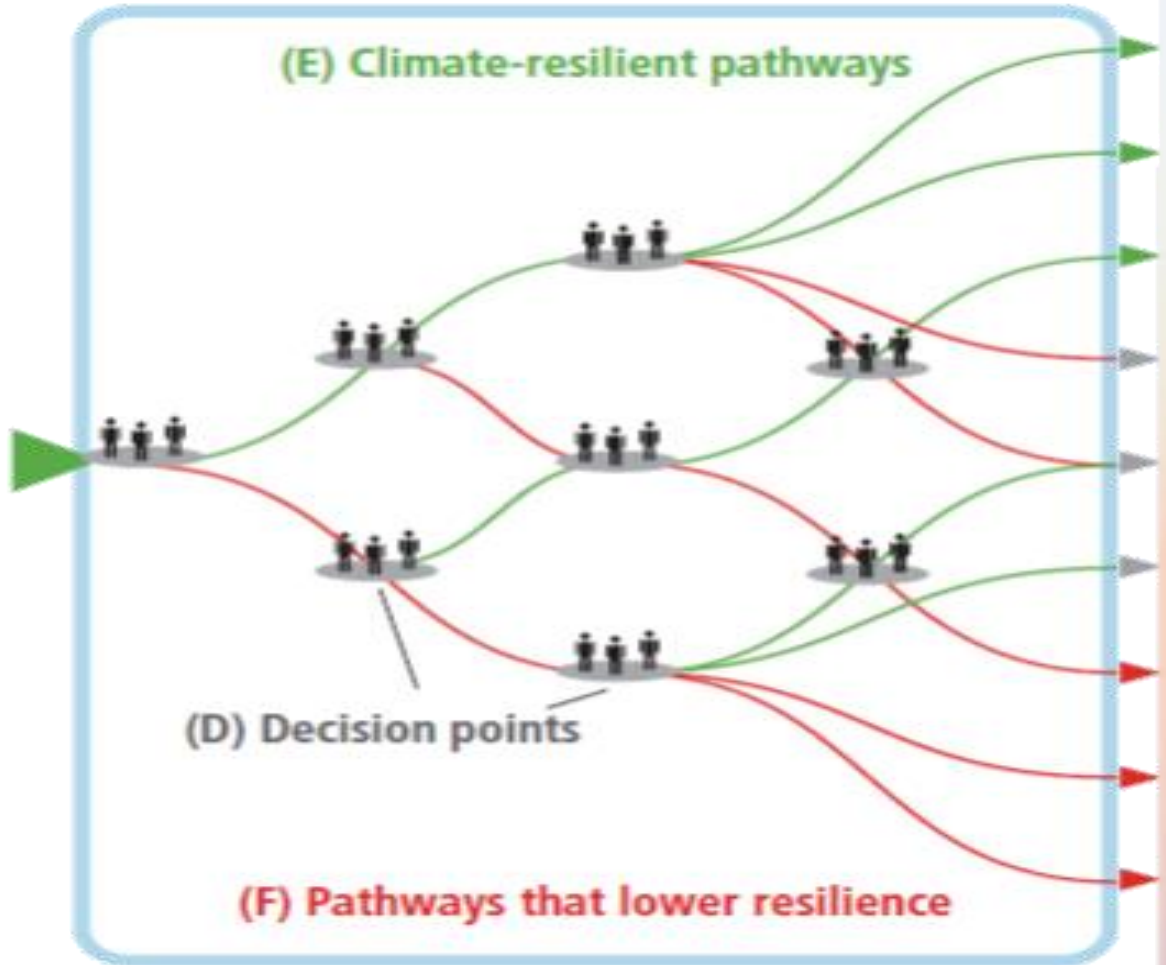

(A) Our world

Multiple stressors including climate change

- Biophysical stressors
- Resilience space
- Social stressors

(B) Opportunity space

(C) Possible futures

The Choice is Ours
